VEHICLE & TRANSPORTATION
TECHNOLOGY INNOVATION MEETINGS

Piemonte, the centre of future road mobility

Road mobility is undergoing a **revolution** driven by four major trends: **emission reduction, connectivity, Artificial Intelligence and new customer needs**. Electric and/or hybrid vehicles will become in the future the top selling products, connected to each other and to the infrastructure and able to move autonomously.

This will be a breakthrough in the transportation of people and goods, and will significantly change the way vehicles will be designed, developed, produced and used. **New mobility models and the related services** will be diffused, creating stimulating opportunities of new products and services.

Piemonte is a leading cluster in the global automotive sector, thanks to the presence of major international **OEMs** and other **stakeholders**, a **complete and competitive supply chain, R&D centres, universities and engineering services**. Altogether they are active in the development of disruptive technologies to fulfil the needs of future road mobility, developing distinctive technologies and solutions in the fields of **electrification, connectivity, autonomous driving, sustainable and sharing mobility, Big Data and software-designed vehicles**, projecting the whole territory towards new challenges and new consumer markets.

When dealing with mobility experimentation, Torino offers exceptional possibilities: it is **in fact one of the first cities in Italy allowing the testing of connected and autonomous vehicles on its public roads** and in real traffic conditions.

VTM is a new mobility technology event that brings together the vehicle and transportation community: from vehicle makers and tier suppliers to mobility decision makers, disruptive technology entrepreneurs and solution providers.

This unmissable event features a full program of conference sessions that will bring together the vehicle and transportation community to explore the key challenges and opportunities of the future of mobility and new vehicle technologies.

2018 FIGURES

2,500
B2B Meetings

1,300

INNOVATIVE B2B MEETINGS

WHO CAN ATTEND?

BUYERS

YOU WANT TO MEET SUPPLIERS AND MANUFACTURING PARTNERS!

You're involved in: Supply chain | Procurement | Purchasing | Engineering | Fabrication | R&D, etc.

SUPPLIERS

YOU WANT TO SELL YOUR CAPABILITIES, PRODUCTS OR SERVICES!

You're involved in: Sales | Marketing | Business development | Technical promotion, etc.

Represented countries

Italy, France, China, Austria, Belgium, UK, Germany, Slovenia, Spain, Israel, USA, Sweden, Russia, India, South Korea, Switzerland.

an innovative format for an innovative sector

Session conference

B2B meetings

Exhibition

Networking opportunities

Conferences

- Electric and Hybrid vehicles, batteries and electric components
- Hydrogen, new sustainable propulsion systems
- Software-defined vehicles
- Sensing and control technologies for ADAS and autonomous driving
- Short-and long-range Connectivity, smart infrastructures, cloud services
- Micromobility and new mobility concepts
- Safety-Security validation and certification of vehicles and components

EXHIBITION CENTER

The event will take place at OGR Torino: Corso Castelfidardo, 22, 10138 Torino TO, Italy
